

Bourdon tube pressure gauge, copper alloy For welding, cutting and allied processes Models 111.11, 111.31

WIKA data sheet PM 01.03

for further approvals, see page 5

Applications

- For equipment and apparatus for gas welding, cutting and allied autogenous processes
- Pressure and level indication for industrial gases such as oxygen or acetylene
- For mounting to pressure reducers or valves

Special features

- Version per ISO 5171 or for acetylene per ISO 7291
- Safety features Model 111.11: With blow-out device in case back Model 111.31: With solid baffle wall (Solidfront)
- Nominal size (NS) of the case Model 111.11: NS 40, 50 and 63 Model 111.31: NS 50
- Scale ranges to 0 ... 400 bar or 0 ... 6,000 psi

Description

The model 111.11 and 111.31 pressure gauges have been specifically designed for gas welding equipment and meet all requirements of the ISO 5171 standard.

The instruments are based on the proven Bourdon tube measuring system. On pressurisation, the deformation of the Bourdon tube, proportional to the incident pressure, is transmitted to the movement via a link and indicated.

The modular design of the pressure gauge enables a multitude of combinations of case materials, process connections, nominal sizes and scale ranges. Due to this high variance, the instruments are suitable for many applications within the welding engineering sector. An individualisation of the instruments by means of dial printings, such as company logos, is possible.

The safety version of the model 111.31 pressure gauges has a solid baffle wall and also fulfils increased safety requirements regarding personal protection.

Specifications

Basic information	
Standard	 ISO 5171, pressure gauges used in welding, cutting and allied processes ISO 7291, acetylene version for pressure regulators for manifold systems, BAN tested ¹⁾ EN 837-1 ASME B40.100
	For information on the "Selection, installation, handling and operation of pressure gauges", see technical information IN 00.05.
Nominal size (NS)	
Model 111.11	 Ø 40 mm [1 ½"] Ø 50 mm [2"] Ø 63 mm [2 ½"]
Model 111.31	Ø 50 mm [2"]
Connection location	 Lower mount (radial) Centre back mount ²⁾
Window	Polycarbonate
Case	
Model 111.11	Design Safety level "S1" per EN 837-1: With blow-out device
	Material Steel, brass-coloured Steel, black painted Steel, chrome-plated Stainless steel
Model 111.31	Design Safety level "S3" per EN 837-1: With solid baffle wall and blow-out back
	Material Zinc die-cast Painted to customer requirements
Mounting	WithoutPanel mounting flangeSurface mounting flange
Movement	Copper alloy

Measuring element	
Type of measuring element	Bourdon tube, C-type or helical type
Material	Copper alloy
Leak tightness	Leakage rate: < 5 · 10 ⁻³ mbar I/s

Accuracy specification	าร	
Accuracy class		
ISO 5171		Class 2.5
ASME B40.100		±3 % ±2 % ±3 % of measuring span (grade B)
Temperature error		On deviation from the reference conditions at the measuring system: $\leq \pm 0.4$ % per 10 °C [$\leq \pm 0.4$ % per 18 °F] of full scale value
Reference conditions		
Ambient temperature		+20 °C [68 °F]

ISO 7	 R ½, male thread R ¼, male thread
Restrictor	 Ø 0.3 mm [0.012"], copper alloy For acetylene version
Material (wetted)	
Process connection	Copper alloy
Bourdon tube	Copper alloy

Other process connections on request

Other process connections on request		
Operating conditions		
Medium temperature	-20 +60 °C [-4 +140 °F]	
Ambient temperature	-20 +60 °C [-4 +140 °F]	
Pressure limitation		
Steady	3/4 x full scale value	
Fluctuating	2/3 x full scale value	
Short time	Full scale value	
Ingress protection per IEC/EN 60529		
Lower mount (radial)	IP33	
Centre back mount	IP44	

Approvals

Logo	Description	Region
CE	EU declaration of conformity Pressure equipment directive PS > 200 bar, module A, pressure accessory	European Union
UK CA	UKCA	United Kingdom
CA	Pressure equipment (safety) regulations	
-	CRN Safety (e.g. electr. safety, overpressure,)	Canada

Optional approvals

Logo	Description	Region
ß	PAC Kazakhstan Metrology, measurement technology	Kazakhstan
-	MChS Permission for commissioning	Kazakhstan
-	PAC Ukraine Metrology, measurement technology	Ukraine
-	PAC China Metrology, measurement technology	China

Manufacturer's information and certificates

Logo	Description
-	Pressure equipment directive (PED) for maximum allowable pressure PS ≤ 200 bar

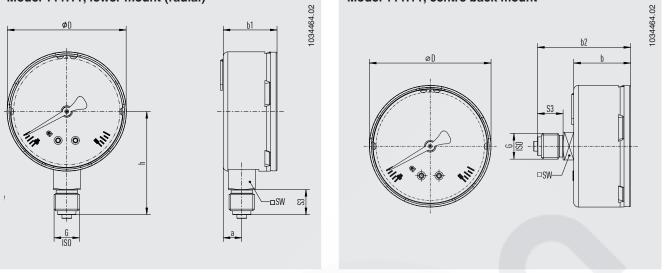

Certificates (option)

Certificates	
Certificates	 2.2 test report per EN 10204 (e.g. state-of-the-art manufacturing, indication accuracy) 3.1 inspection certificate per EN 10204 (e.g. material proof for wetted metal parts, indication accuracy)
Recommended calibration interval	1 year (dependent on conditions of use)
